## CENTRAL ADMISSIONS

Admissions to Kissito Premiere Ventilator Care have been streamlined with the incoming resident in mind. Our admissions team is committed to guiding, advocating and facilitating the resident, family and referring hospital through the complicated process of transitioning from acute care to specialized ventilator care.

We are sensitive to the challenges residents and their loved ones may face when considering a transition in care especially over long distances. Our Patient Advocate is able to provide clarity about the process and provide information about our facilities. We will even walk you through the process of applying for financial assistance face to face as a part of our commitment to you.

Centralized referral processing gives discharge planners access to multiple care center locations through a single contact.

## OUR COMMITMENT AND CULTURE

"Where care breathes life" is not just a slogan, it's what guides us in your care. Every aspect of our day is designed to improve the quality of life for our patients and their families. Our residents don't live to receive care, they live to experience life. The care we provide is specialized for individuals who are dependent on a ventilator to breathe so our residents can experience life on their terms. Kissito exists for the betterment and care of life and that's our commitment to you.

## RESPIRATORY CARE

Respiratory care inside Kissito Premiere Ventilator Care is a collaborative effort with all staff. The Quality of Life Director, Social Worker, Therapists, Nursing team, and Dietary crews provide indispensable support to the respiratory team as well as the necessary rehabilitation and care to our residents. Their support allows the respiratory team to focus on quality outcomes for each resident. Our team follows the American Association for Respiratory Care protocols and guidelines to give our residents every opportunity to achieve their highest potential for weaning. The respiratory teams of Kissito Premiere Ventilator Care take pride in their work whether it is liberating a resident from the ventilator or working toward the highest quality of life on the ventilator.

At Kissito Premiere Ventilator Care life on a ventilator does not have to mean being confined to a bed, having to mouth or write out your needs or depending on tube feeding for nourishment. Our respiratory teams work closely with our Board Certified Pulmonologist to overcome the unique barriers of each resident.

## ADVANTAGES OF KISSITO PREMIERE VENTILATOR CARE

Kissito Premiere Ventilator Care specializes in short and long term respiratory care. Admissions into this program are limited to only the ventilator dependent hospital patients. This allows our team to provide focused quality care and comprehensive cross training for all staff in an effort to produce better outcomes. Inside the Kissito Premiere Ventilator Care program you are no longer a patient, you are our resident. Serving the ventilator dependent community is not just what we do, it is EVERYTHING we do.
